

Cast Iron Riser Tubes Datasheet

Strong, Durable, Cost Effective Riser Tubes

CCPI Europe has provided ceramic-coated, alloyed, cast iron products to low pressure die casters for nearly 50 years. Cast iron, ceramic-coated riser tube offer versatility, consistent performance and value.

Riser Tubes offer you:

- Versatility of design
- Tubes that will not break or crack during handling and placement
- No preheating required
- Elimination of "in house" coating
- Uniform life allows scheduled change out of tubes
- Available with filters in place

Riser Tubes are manufactured using:

- Proprietary alloyed cast iron
- Spectrochemical analysis of every batch
- All parts are ground and shot blasted prior to ceramic coating

The CCPI coating process offers:

- Formulations designed for molten metal contact
- Coatings designed to thermally correspond to cast iron
- Coatings "fired" on prepared iron castings
- Ceramic coating formula and applications processes monitored statistically for uniformity and integrity
- Coatings designed for your specific application
