

Degassing Steel Flux Pipes Datasheet

The economical way to effective fluxing of molten aluminium

CCPI Europe's fluxing pipe is a ceramic-coated steel pipe that provides unique benefits to the aluminium processor.

Product Specifications

- Flux pipe entirely surfaced with high quality ceramic coating
- Flux pipe is resistant to fluxing gases for long life
- Available with porous diffusers

Benefits

- Coating high fired to provide maximum performance
- Excellent physical strength
- Resistant to molten aluminium

Available In:

- 25mm (1") and 32mm (1¼") diameter pipe
- Lengths from 2134mm (7') through 5486mm (18') - in 152mm (6") increments
- Flux pipe is furnished straight or bent to specification
- Furnished with standard pipe threads at one end
